## DETAILED ACTION

### *Election/Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-14 and 26-36, drawn to an automated financial, business, or management practice comprising point-of-sale tax payment credit or processing, classified in class 705, subclass 19.
  - II. Claims 15-25, drawn to a method of business, finance, or management comprising generic or non-electrical computing, classified in class 705, subclass 500.
2. The inventions are distinct, each from the other because of the following reasons:

Invention II is related to Invention I, as process and apparatus for its practice. The inventions are distinct if it can be shown that *either*: (1) the process as claimed can be practiced by another, materially different apparatus, or by hand, *or* (2) the apparatus as claimed can be used to practice another, materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another, materially different apparatus, or by hand, such as by hand, using a paper directory/listing of tax rates and a telephone.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was placed to Mr. Howard I. Sobelman (Reg. No. 39,038), attorney for applicant, on May 20, 2005, to discuss an oral election to the above restriction requirement, but the call did not result in an election being made.

5. Applicant is advised that the reply to this requirement, to be complete, *must* include an election of the invention to be examined, even if the requirement be traversed (37 CFR 1.143).
